

## OUR VISION

### One user friendly platform. Three smart concepts.

More and more organizations are accepting new styles of working and this is changing the function of offices. Employees want to work together and meet guests instead of only just coming to work. But creating more meeting rooms and fewer workplaces is not enough. The day-to-day reality is: searches for a room or workplace, disruptions during a meeting or while working, untraceable colleagues and visitors who have to wait at the reception. This ensures reduced productivity.

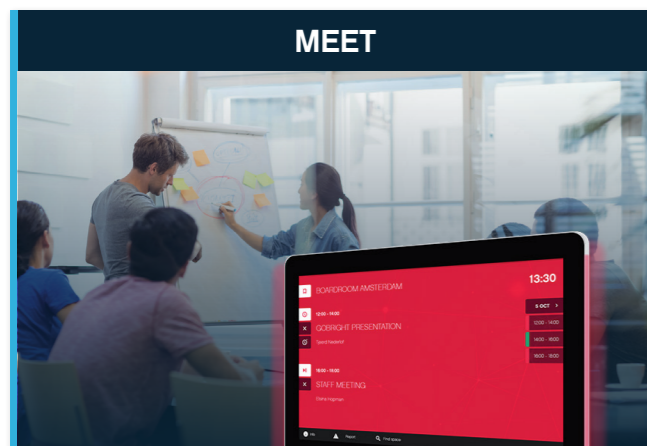

Today employees want to organize a meeting independently, reserve a room or workplace directly and send invitations easily. They want optimal availability of flexible workplaces and dislike claiming desks. Their guests don't have to wait too long and must be at their destination quickly.

GoBright meets these needs. We are creating availability and support employees with three accessible concepts for Meet, Work and Visit Management. So that they are able to do their work smartly, pleasantly and efficiently. We are giving organizations the opportunity to develop new ways of working and save costs and energy. Because, if employees can create availability very easily, they will use these solutions automatically.

**Technology makes it possible,  
GoBright makes it available**

### Our two other brochures

Check the **availability** of a room in the blink of an eye

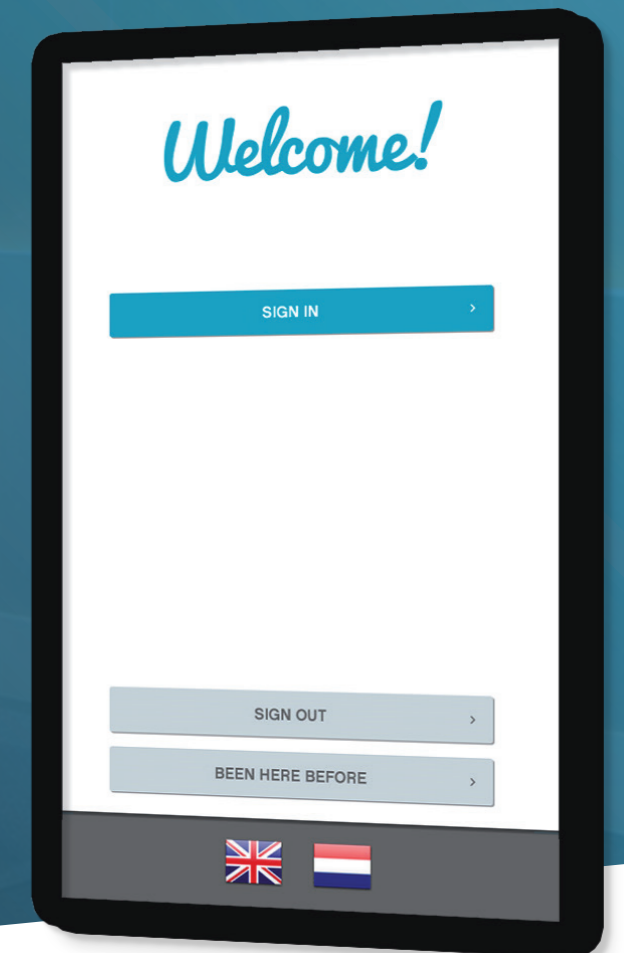

Turns a flexible workspace into your **personal desk**

## VISIT

# Easy and GDPR-proof digital self-registration by visitors

## STANDARD SELF-REGISTRATION

# Easy and GDPR-proof digital self-registration by visitors

GoBright digital self-registration provides a professional and modern self-registration by visitors, so the receptionist can continue to focus on his or her core tasks. It is also an ideal tool for unmanned receptions. After registration, the host receives an SMS and e-mail notification to pick up the guest. The software shows a real time overview of who is or has been in the building, which can be very useful in case of emergencies. In addition, the organization also directly complies with the GDPR-requirements of the EU of visitor registration.

### INTUITIVE USE

Easy registration in a few steps.

### GDPR-PROOF

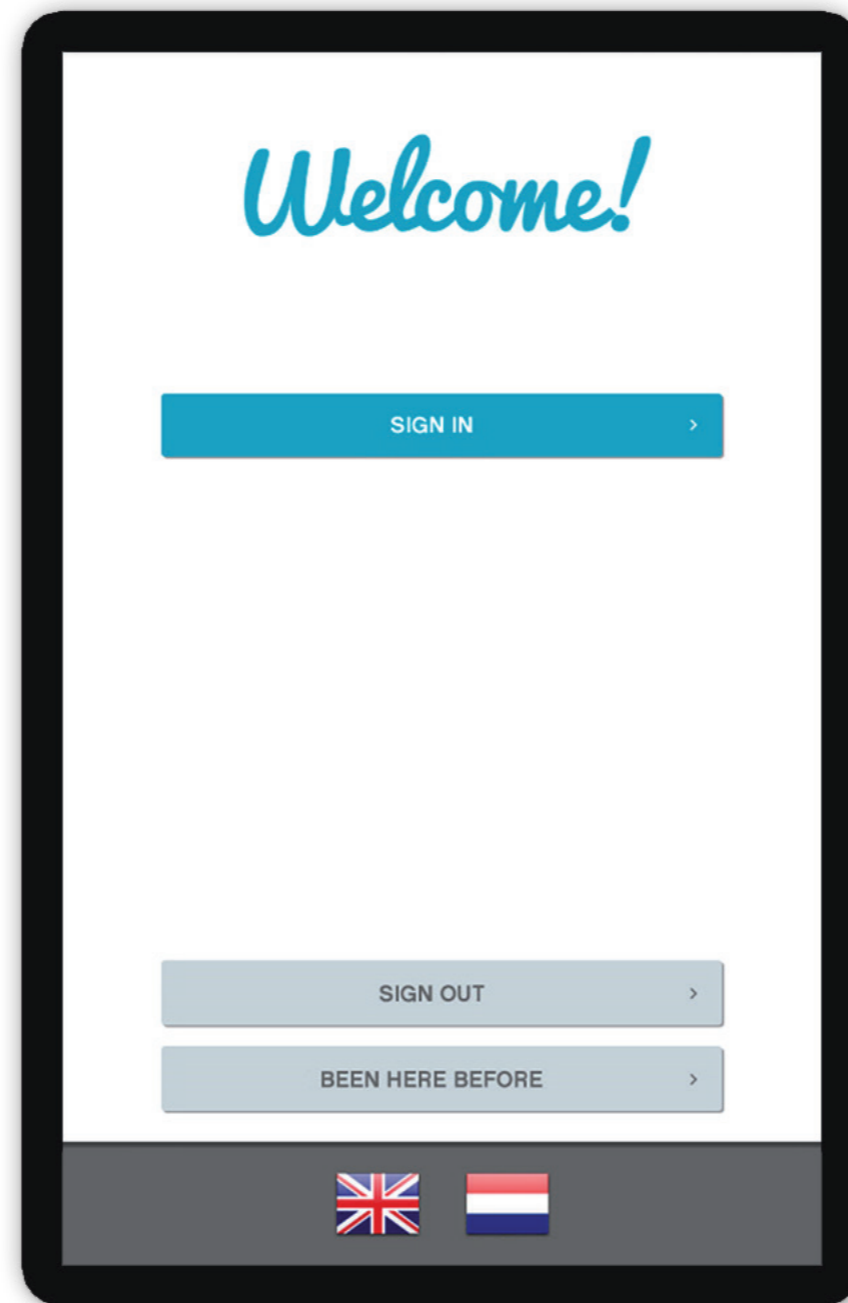

Meets the privacy requirements of the GDPR-legislation.

### RELIEVES RECEPTIONIST

Receptionist can focus on his or her core tasks and act more like a host.

### OVERVIEW

Real-time online secured overview of who is or has been in the building.

### DIRECT SMS/E-MAIL

Faster availability of the host thanks to a direct SMS and e-mail notification.

### OWN DESIGN

Logo, colors, texts and entry fields can be adjusted to match with the company style.

### VARIOUS INTEGRATIONS

Active Directory and GoBright Room Booking.

### MULTILINGUAL

Standard available in English and Dutch. Other languages on request.

## ADDITIONAL BADGE PRINTING

# For optimal visibility of visitors

Increase the visibility of your visitors within the building with a professional badge. Print the badges with your own design, company logo and colors. After a visit, it is very easy to check out and check in on the next visit by scanning the QR-code on the badge.
