

Avocor Note by Nureva™ is an easy to use whiteboarding application that includes a comprehensive range of interactive tools. With a selection of professionally created backgrounds, images and icons, the software has been specially designed to enable every user to create professional looking whiteboard content.

Avocor Note by Nureva works beautifully with Avocor Intelligent Touch using InGlass™ technology, fully supporting object awareness, including pen, finger and palm recognition.

Content created in the software can be easily shared with others, either as a complete whiteboard session page, individually as images or the whole file printed as a PDF file for quick and easy distribution anywhere in the world. Content can also be brought in and shared through the ever-popular Microsoft Share Charm into and from other applications, such as OneNote and Microsoft EDGE, for further collaboration.

Avocor Note by Nureva comes as standard with all Avocor interactive displays.

Fast and Easy to use

Designed and developed to be the easiest and quickest whiteboarding application available for Windows 10 allowing any end user, regardless of experience, to create professional looking whiteboard content.

Multi touch

Enhanced pen and multi-touch capabilities ensures users can simultaneously use and manipulate images and icons creating a truly collaborative whiteboarding platform.

Sharing your Creations

Content can be easily shared with others, either as a complete whiteboard session, individual images or as a .PDF file for quick distribution. Pages can also be shared to a range of globally recognised applications, such as OneNote and Word.

Professionally Created Content

Built with a comprehensive selection of professional backgrounds, images, and icons to enable end users to create impactful content quickly and easily.

Export to Span Functionality

Fully integrate with Nureva's cloud based Span solution by exporting your content created straight into the Span Ideation Solution for an end-to-end collaborative solution for multi-group collaboration.

Regular FOC Updates

Ongoing, continual development to the software will provide a regular upgrade platform, completely Free of Charge, ensuring an easy and hassle free user experience.
